It was there she developed the gene therapy that eventually became the Genome Army project, the result of which isolates and reprograms specific genes to create soldiers with incredibly heightened senses of combat awareness. This breakthrough prompted the Foxhound medical staff to recruit her as a freelance agent to upgrade and maintain genetically altered Foxhound operatives.

Abrupty pulled off her research into a genetic disease known to kill Genome subjects, Dr. Hunter has been called in by the U.S. government to provide insight and assistance in dealing with the genetically enhanced Foxhound defectors invoked in the Shadow Moses crisis.

Mei Ling

Real Name: Mei Ling Sex: Female Status: Single Age: Teens Nationality: Chinese Height: 156 cm.

Additional skills: Innovator and developer of communications and radar systems. Expertise in image and data processing. Although born on U.S. soil, Mei Ling's earliest years were spent in a Chinese settlement camp deep in the Kwangtung province. Later, she moved back to America and joined the BOTC program at MIT with hopes of ultimately joining the Air Force. Unfortunately, she was forced out of the program due to poor evesight and lack of self-confidence. This setback led her to research and develop radar technology that would assist the vision-impaired. Her research eventually caught the eye of military intelligence, which subsequently hired her to help develop digital espionage radar systems under the auspices of various government contractors.

Mei Ling now works under Colonel Campbell at the submarine headquarters to coordinate and transcribe communications between Solid Snake and Control. For this mission, she has developed the Codec, a Codifying Satellite Communication System that incorporates antiwiring coding, digital real-time burst communication, and sonar and radar functions. Codified and compressed signals can be sent, between parties, which upon receipt are unscrambled and decoded instantaneously.
